

# HEAVY ENDURO 300

ProLan Heavy Enduro is **tested to C4 for permanent and durable** corrosion protection

## Applications

- **ProLan Heavy Enduro Anti Rust** is designed to extend the life of all large metal surfaces – including stainless steel, chrome, brass and copper. However, it **retains elasticity** so there is no risk of cracking.
- ProLan Heavy Enduro is **highly penetrating, penetrating metal to stop corrosion**.
- ProLan Heavy Enduro can be applied directly to a rusty surface for long-term protection and **prevents new rust from forming**. Tested like no other for C4 onshore/offshore.
- ProLan Heavy Enduro is used for **undercarriage protection against rust of all kinds. Transparent**.
- NSF International Food-Grade **class H1 for the food industry**.
- ProLan Heavy Enduro **withstands 170-bar high-pressure cleaning, is highly wear-resistant** after drying and insoluble in water.
- **Resistant to acids**, salts, salt water, fertiliser and corrosive elements in general. Unique durability.
- ProLan Heavy Enduro **does not damage** glass, lacquer, leather, chrome and treated surfaces in general. Unique durability.
- ProLan Heavy Enduro can be removed from surfaces with odourless kerosene or similar.
- **UV-resistant** up to 24 months. **Acid and silicone-free**
- **Electrically and electrolytically separating up to 70 kV**, providing optimal protection for all electrical installations in dry and damp environments.
- ProLan Heavy Enduro can put off and **eliminate many repairs**, as it is designed for industry.

## PROLAN HEAVY ENDURO is ideal for

- **Offshore fish farms – aquaculture** – underwater – bolts in general in corrosive environments to prevent rust
- **Radar systems in corrosive environments – military installations** – exposed installations – electrical plugs – fishing vessels
- **Battery poles** – offshore – ship decks – **offshore cranes – wind turbine installations** – onshore/offshore
- **Construction machinery** – salt equipment in general – **vintage cars** – undercarriage protection – **cavity treatment**
- **Garages** – rust protection – landscaping machinery – agriculture – rust film
- **Destroys rust** – gears – **pumps** – construction – stainless polishing – steel wires.
- Steel structures.
